

Bird Safe Philly

INJURED BIRD TRANSPORT VOLUNTEERS

Duties and expectations

- Drivers commit to being on standby in Center City, Philadelphia to receive and transport injured birds by 8am one or more mornings of the week throughout the monitoring season (Spring: April 1 - May 31, Fall: Sep. 1 - Nov. 15.) Additional, as-needed availability is welcome should the need for a substitute driver arise.
- Monitors will communicate the need for a driver via the Bird Safe Philly Telegram channel, using the free Telegram app. Drivers should respond via the app to confirm their availability.
- Drivers arrive at **2 Logan Square (18th and Arch St.)** in time to pick up injured birds from our monitors by 8am. Monitors may directly hand off birds to drivers or may leave bagged, live birds in the designated Bird Safe Philly holding box located in the 2 Logan Square garage (entrance on Arch St., ring bell if door is closed.) Monitors will not leave birds in the box without confirming a driver is en route.
- Drivers will take the bagged birds directly to the **Schuylkill Center Wildlife Clinic in Roxborough: 304 Port Royal Ave, Philadelphia, PA.** For safely transporting birds, drivers should keep a box with a small towel handy, for cushioning the bags while en route to the clinic. Keep the box tucked safely on the floor of the vehicle.
- Drivers will transport birds directly to the Schuylkill Center, do not leave live birds in a vehicle unattended.
- If no staff is immediately present, birds are to be left in the small drop off shed adjacent to the parking lot. A brief intake form is required for dropping off birds, drivers will complete this to the best of their ability, referencing the birds' corresponding bag label, leaving the form and bagged bird together in the shed.
- To get involved as an injured bird driver, email Robin.Irizarry@audubon.org.
